This is the first office action for application number 09/916,385, Linoleum-Based Planar Structure and Process for Making Same, filed on July 27, 2001.

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 19-58, drawn to the product of figure 3 and the product of the process shown in figures 1 and 2, classified in class 428, subclass 327.
- II. Claims 59-73, drawn to the process shown in figures 1 and 2, classified in class 156, subclass 60.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different products or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed could be made via mixing and grinding a linoleum base composition and organic flakes and subsequently forming or rolling the mixture into a planar structure.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3632
